

## Aerial Work Platforms

Aerial Work Platforms - There are various lift truck attachments available on the market. They could help transform your forklift so that you could expand your ability to pick stuff up or complete clean up jobs and material handling with greater ease.

Some accessories were specifically designed for the forks themselves. For instance, blade extensions are used if you require more fork length, which increases lifting capacity. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular accessories are one more type utilized if moving rolled material so as to make certain it does not roll off of the standard flat blades.

Examples of lifting accessories consist of pivoting and telescoping boom or crane accessories. They could come in several various styles and are normally designed for moving poles, metal bars, lumber and different kinds of bulky objects. Other attachments like for instance different styles of hooks and hook plates are accessible to be able to pick up items using a sling or chain. Magnetic lifters and slab lifters are other things which could be used along with hook accessories. Slab lifters are specialized accessories that are utilized for picking up different materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your lift truck in order to make transporting rolls of carpet a lot easier. The attachment connects onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are several types of lift truck accessory intended for facility maintenance like for instance snow forks. These industrial blades can be connected to front end loaders and designed for moving materials like for example dirt, and mulch as well as snow. Other popular cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers comprise a broom that the forklift forks hook onto for sweeping large spaces such as warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up effortless and quick.

Material spreaders are other accessories utilized on lift trucks. These spreaders are useful for a range of applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting accessory are work platforms. These can be used by several various businesses everyday. Platforms may vary in size from 36" x 36" to up to 60" x 60". Some units may be offered and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location utilizing the lift truck. Larger platform models have additional space for staff to carry tools and other necessary things for the task. Often work platforms are made of poly material or steel.
