

## Clark Forklift Part

Clark Forklift Parts - Performing worldwide, there are currently 350,000 Clark forklifts and lift vehicles in operation, with more than 250,000 of those operating in North America. Clark has five main lines of lift trucks across the globe, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 unique brands of forklifts, with components covering more than 120,000 particular parts for all of its automated equipment. Your regional Clark Supplier is your total source for availability of all your components needs provided by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Clark Totalift has a really amazing worldwide support network. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a standard feature on every lift truck.

Clark has a uncompromising mission to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a dominant industry position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this technique is extremely economical and enables minimal use of resources. Established to guarantee maximum efficiency, this system is designed to discover and acknowledge the most efficient ways for production facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing expenses. The contemporary value engineering agenda combines innovative product improvement and delivers improved client support and service within the industry.
