With a network consisting of over 90 independent sellers, the forklift group provides quality materials handling equipment to the comprehensive North American market. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and product sales locations throughout Canada and the U.S. The forklift product line impressively includes 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle versions range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck company in the North American marketplace, thanks to its excellent level of product performance and their consistently high level of consumer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division stationed in Cleveland has a skilled team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based machinery expansion venture. Product sales of these goods were initially targeted to state-run firms, large scale organizations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a position of significant growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a international sales network and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
