

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

All through their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could swiftly and securely lift individuals in the air to accomplish upkeep and other building services.

After their return from vacation, John set up a joint venture with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into current versions.

JLG lift trucks have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into many markets globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
